## Taos County

Released: June 2023

Chart 1. Matched Taxable Gross Receipts Per Quarter

In the third quarter of FY23, 26 of 33 counties saw year-over-year economic growth, averaging 12% growth statewide in matched taxable gross receipts. State gross receipts decreased from the second quarter of FY23. This, however, follows the seasonal trend that the state has experienced historically in Q3. As growth in New Mexico continues, national concerns remain regarding inflation and rising interest rates while labor markets continue to adjust post pandemic.

Taos County's matched taxable gross receipts (MTGR) decreased slightly in Q3 FY23 as compared to Q2 FY23, seen in Chart 1. From Q2 FY23 to Q3 FY23 MTGR decreased by \$3.8M or 1.3%. Despite this slight decrease, the reported MTGR for Taos County during Q3 FY23 (\$282M) is the third largest amount ever reported in the county, following the two previous quarters. Table 1, on the next page, shows an increase of \$20M from Q3

Chart 2. FY23 - Q3 Industry Size by Matched Taxable Gross Receipts

**Matched Taxable Gross Receipts (MTGR)** are the best tax data available to show underlying economic activity. The data collection process matches a tax payment with reported receipts for each taxpayer by industry.

in FY22 to FY23 of the same period. Table 1 also shows six industries that reported a year-over-year (YOY) loss, while 14 reported an increase. The largest increase came from the construction industry, which saw YOY growth of \$6.4M. The management of companies and enterprises likely had an error in the tax reporting that was corrected in Q3 FY22 resulting in a negative MTGR reported for that period.

Gross receipts tax (GRT) revenue collections decreased by \$1.5M, or 28%, from Q2 FY23 to Q3 FY23, shown in Chart 4. The county saw a YOY decline in GRT collections of 12.4%.

Chart 6. Establishment Year-Over-Year % Change

An **establishment**, as used in the QCEW and subsequently Chart 6 and Table 2, is an economic unit, such as a farm, factory, or store, which produces goods or provides services at a single physical worksite and is engaged, predominantly, in one type of economic activity.

The **Quarterly Census of Employment and Wages**, or the **QCEW**, used in Charts 5-6 and Table 2, produces comprehensive data on the number of establishments, monthly employment and quarterly wages for workers covered by state unemployment insurance (UI) laws and federal workers covered by the Unemployment Compensation for Federal Employees (UCFE) program. These data are aggregated to many different levels, starting at the 6-digit NAICS industry level, to higher industry levels (NAICS industry groups, sectors, and supersectors), and to higher geographic levels (MSA, state and national).

Data are based on information reported by New Mexico employers, covering 97% of nonfarm wage and salary workers. Data are published every quarter. Considered the gold standard for its reliability of industry data, the QCEW data are the most complete universe of monthly employment and quarterly wage information by detailed industry.
