

Quarterly Economic Summary

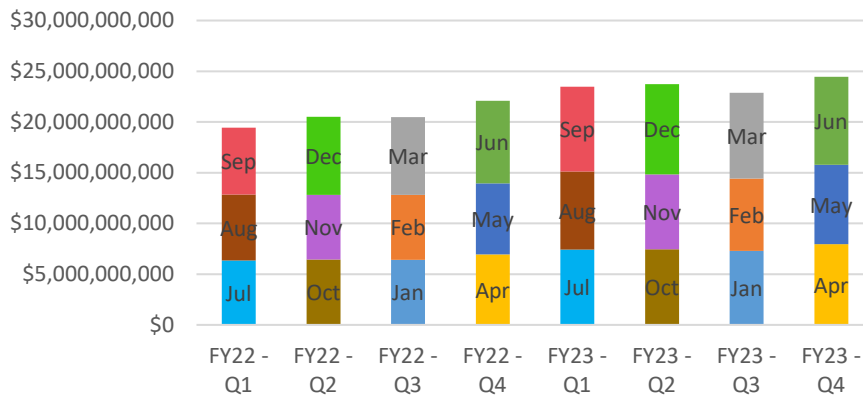

New Mexico

Released: September 2023

Prepared by: Joel Salas, Economist; Ryan Eustice, Economist

Chart 1. Matched Taxable Gross Receipts Per Quarter

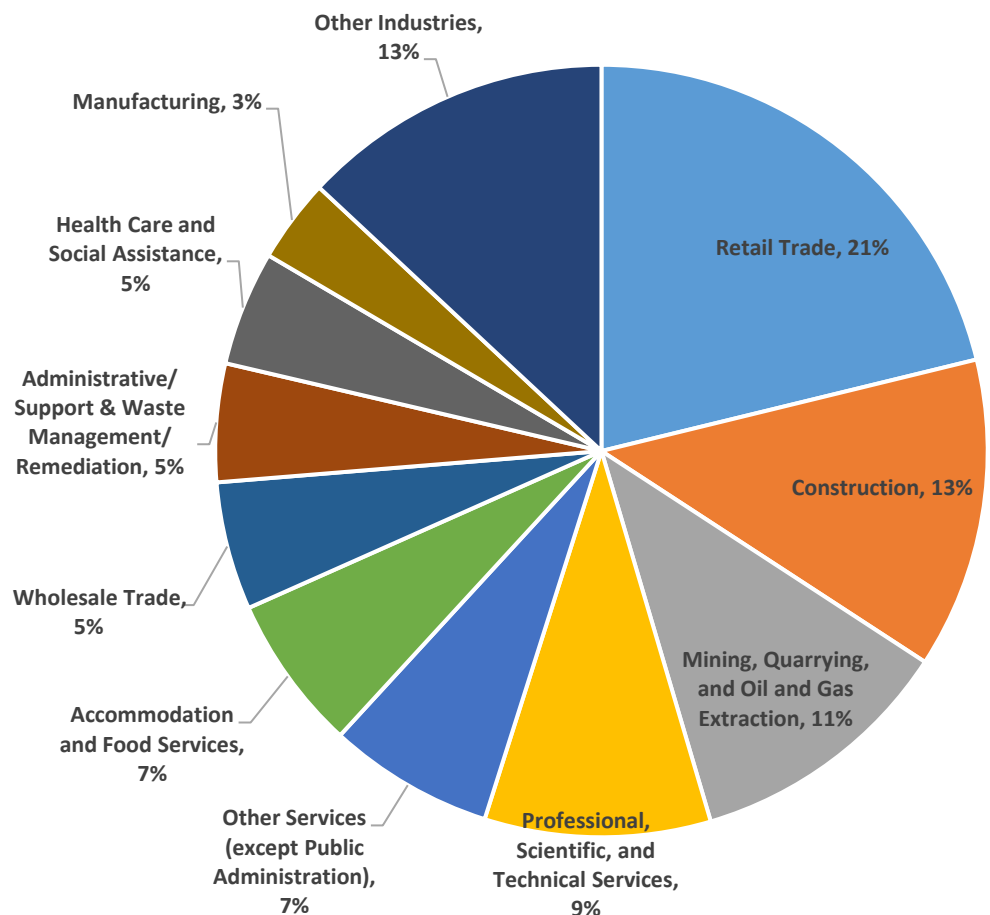

New Mexico's total matched taxable gross receipts (MTGR), in Q4 FY23, increased by \$1.57M, or nearly 7%, from the previous quarter. This increase continues the upward trend that MTGR has had over the last 8 quarters. The average monthly MTGR for the previous 24 month is \$7.4B, which is \$1.2B less than the amount reported during the month of June, the largest reported amount, in Q4 FY23 (\$8.67B). Over the last 8 quarters, MTGR has averaged \$22B or \$2.3B less than the amount reported during Q4 FY23 (\$24.4B). Shown in Chart 2, the largest industry as

a percentage of MTGR was the retail trade industry, which accounted for 21% of the total MTGR during Q4 FY23. Last quarter the industry accounted for just under 21%. Table 1, on the next page, shows that the largest year-over-year (YOY) increase came from the professional, scientific, and technical services industry, followed closely by the oil and gas industry. When comparing the two time periods, the industries grew by a combined \$846M and accounted for over 36% of the state's YOY growth.

Matched Taxable Gross Receipts (MTGR) are the best tax data available to show underlying economic activity. The data collection process matches a tax payment with reported receipts for each taxpayer by industry.

The **Quarterly Census of Employment and Wages** or the **QCEW**, used in Charts 4-5, produces comprehensive data on the number of establishments, monthly employment, and quarterly wages for workers covered by state unemployment insurance (UI) laws and federal workers covered by the Unemployment Compensation for Federal Employees (UCFE) program. These data are aggregated to many different levels, starting at the 6-digit NAICS industry level, to higher industry levels (NAICS industry groups, sectors, and supersectors), and to higher geographic levels (MSA, state and national). Data are based on information reported by New Mexico employers, covering 97% of nonfarm wage and salary workers. Data are published every quarter. Considered the gold standard for its reliability of industry data, the QCEW data are the most complete universe of monthly employment and quarterly wage information by detailed industry.

Quarterly Economic Summary New Mexico

Chart 5. Total Employment & Weekly Wage

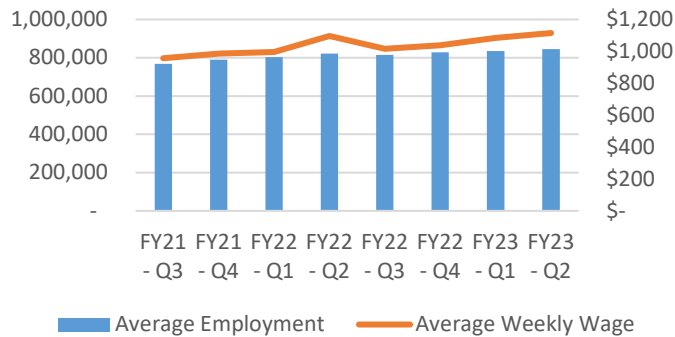

Chart 6. YOY % Change in GDP per Quarter

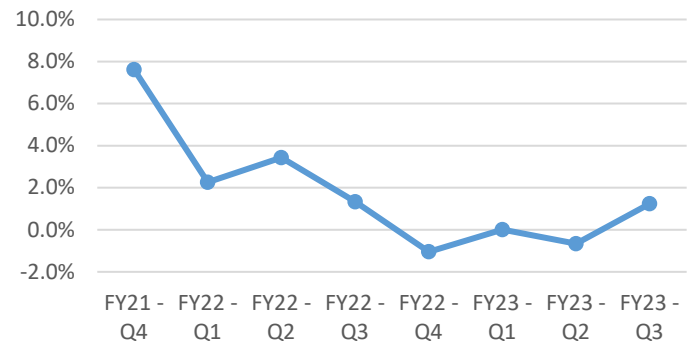

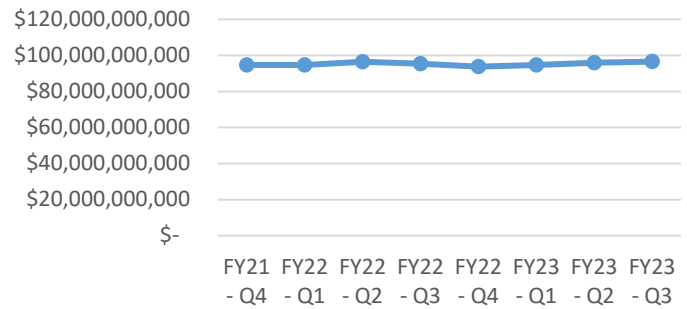

Chart 7. Gross Domestic Product Per Quarter

The value of all goods and services produced in New Mexico is the **Gross Domestic Product (GDP)**. The percentage that GDP grew (or shrank) from one period to another is an important way for the state to gauge how the economy is performing. GDP in Charts 7-8 and Table 2 depict real GDP in chained 2012 dollars.

Table 2. Gross Domestic Product by Industry

Industry	FY22 - Q3	FY23 - Q3	Growth	Year Over Year Change
