

Quarterly Economic Summary

New Mexico

Released: February 2024

Prepared by: Joel Salas, Economist

Chart 1. Matched Taxable Gross Receipts Per Quarter

New Mexico's total matched taxable gross receipts (MTGR), in Q1 FY24, increased by \$1.18B, or nearly 5% from the previous quarter. This increase continues the upward trend that MTGR has had over the last 8 quarters. The average monthly MTGR for the previous 24 month is \$7.6B, which is \$1.56B less than the amount reported during the month of September, the largest reported amount, in Q1 FY24 (\$9.2B). Over the last 8 quarters, MTGR has averaged \$22.9B or \$2.7B less than the amount reported during Q1 FY24 (\$25.6B). As seen in Chart 2, the largest industry as

a percentage of total MTGR was the retail trade industry, at 20% of the total MTGR during Q1 FY24. Last quarter the construction industry accounted for 21%. Table 1, on the next page, shows that the largest year-over-year (YOY) increase came from the construction industry followed closely by the professional, scientific, and technical services sector. The agriculture, forestry, fishing, and hunting industry shows negative MTGR in Q1 FY23. This could be due to amended tax filings with TRD.

Chart 2. FY24 - Q1 Industry Size by Matched Taxable Gross Receipts

Matched Taxable Gross Receipts (MTGR) are the best tax data available to show underlying economic activity. The data collection process matches a tax payment with reported receipts for each taxpayer by industry.

All Industries	\$ 23,472,141,313	\$ 25,615,791,089	\$ 2,143,649,775	9%

The **Quarterly Census of Employment and Wages**, or the **QCEW**, used in Charts 4-5, produces comprehensive data on the number of establishments, monthly employment and quarterly wages for workers covered by state unemployment insurance (UI) laws and federal workers covered by the Unemployment Compensation for Federal Employees (UCFE) program. These data are aggregated to many different levels, starting at the 6-digit NAICS industry level, to higher industry levels (NAICS industry groups, sectors, and supersectors), and to higher geographic levels (MSA, state and national). Data are based on information reported by New Mexico employers, covering 97% of nonfarm wage and salary workers. Data are published every quarter. Considered the gold standard for its reliability of industry data, the QCEW data are the most complete universe of monthly employment and quarterly wage information by detailed industry.

Quarterly Economic Summary

New Mexico

Chart 5. Total Employment & Weekly Wage

Chart 6. YOY % Change in GDP per Quarter

The value of all goods and services produced in New Mexico is the **Gross Domestic Product (GDP)**. The percentage that GDP grew (or shrank) from one period to another is an important way for the state to gauge how the economy is performing. GDP in Chart 7-8 and Table 2 are real GDP in chained 2012 dollars.
