The largest decline came from the unclassified establishments sector, which posted a YOY decrease of \$13M. The agriculture, forestry, fishing, and hunting industry, in Table 1, shows negative MTGR in Q1 FY23. This could be due to amended tax filings with TRD. The amount of quarterly gross receipts tax (GRT) collections during Q1 FY24 (\$23.5M), as seen in Chart 4, is an increase of \$6.9M, or 41.7%, as compared to Q4 FY23.

Chart 6. Establishment Year-Over-Year % Change

An **establishment**, as used in the QCEW and subsequently Chart 6 and Table 2, is an economic unit, such as a farm, factory, or store, which produces goods or provides services at a single physical worksite and engaged, predominantly, in one type of economic activity.

Gross Domestic Product (GDP) is the value of all goods and services produced in an area. The percentage that GDP grew (or shrank) from one period to another is an important indicator as to how the economy is performing. Table 2, below, shows the percentage of GDP each industry accounts for in the total GDP, in a specific county and the state. The chart also compares the county to the entire state of New Mexico, by showing the impact of specific industry sectors on the county's GDP compared to that of the whole state.
