

Quarterly Economic Summary McKinley County

Released: May 2024

Prepared by: Joel Salas, Economist; Daye Kwon, Economist

Chart 1. Matched Taxable Gross Receipts Per Quarter

In the second quarter of FY24, 25 of 33 counties saw year-over-year economic growth, with 5.1% growth statewide in matched taxable gross receipts (MTGR). State MTGR was the second highest quarterly total, trailing only the previous quarter, Q1 FY24. As inflation remains stubborn, employment, wages, and number of establishments are up year-over-year in New Mexico.

McKinley County's matched taxable gross receipts (MTGR) declined by \$20.2M from Q1 FY24 to Q2 of FY24. Retail trade, construction, and accommodation and food services were the top 3 industries by MTGR in Q2 FY24, as seen in Chart 2. Table 1, on the next page, shows a year-over-year (YOY) increase in Q2 FY24 of 10%, or \$34.1M, compared to Q2 FY23. The largest contributor to this increase came from the construction industry.

Chart 2. FY24 - Q2 Industry Size by Matched Taxable Gross Receipts

Matched Taxable Gross Receipts (MTGR) are the best tax data available to show underlying economic activity. The data collection process matches a tax payment with reported receipts for each taxpayer by industry.

All Industries	\$ 345,904,249	\$ 380,033,325	\$ 34,129,076	10%

The public administration industry in Table 1 does not have data for Q2 FY24. This occurs frequently for this industry within McKinley County and could be due to data being withheld to avoid disclosure of confidential information because of too few tax filers during the period. Gross receipts tax (GRT) revenue collections decreased by \$2.9M, or -37.8%, from Q1 FY24 to Q2 of FY24, as seen in Chart 4. Over the last eight quarters GRT collections have averaged \$5.2M. As seen in Chart 5, Q1 FY24 total average employment in the county grew by 393, YOY, which equates to a percentage increase of 2.1%. Average weekly wages in Q1 FY24 experienced a YOY increase of \$19, a percent increase of 2.3%.

Quarterly Economic Summary

McKinley County

Chart 6. Establishment Year Over Year % Change

An **establishment**, as used in the QCEW and subsequently Chart 6 and Table 2, is an economic unit, such as a farm, factory, or store, which produces goods or provides services at a single physical worksite and is engaged, predominantly, in one type of economic activity.

The **Quarterly Census of Employment and Wages**, or the **QCEW**, used in Charts 5-6 and Table 2, produces comprehensive data on the number of establishments, monthly employment and quarterly wages for workers covered by state unemployment insurance (UI) laws and federal workers covered by the Unemployment Compensation for Federal Employees (UCFE) program. These data are aggregated to many different levels, starting at the 6-digit NAICS industry level, to higher industry levels (NAICS industry groups, sectors, and supersectors), and to higher geographic levels (MSA, state and national).

Data are based on information reported by New Mexico employers, covering 97% of nonfarm wage and salary workers. Data are published every quarter. Considered the gold standard for its reliability of industry data, the QCEW data are the most complete universe of monthly employment and quarterly wage information by detailed industry.

Table 2. FY24 - Q1 Employment Data and Establishments by Industry

Industry	Average Employment	YOY Change in Average Employment	Average Weekly Wage	YOY change in Average Weekly Wage	Number of Establishments	YOY Change in Establishments
