Released: May 2024

Prepared by: Joel Salas, Economist; Daye Kwon, Economist

Chart 1. Matched Taxable Gross Receipts Per Quarter

In the second quarter of FY24, 25 of 33 counties saw year-over-year economic growth, with 5.1% growth statewide in matched taxable gross receipts (MTGR). State MTGR was the second highest quarterly total, trailing only the previous quarter, Q1 FY24. As inflation remains stubborn, employment, wages, and number of establishments are up year-over-year in New Mexico.

Over the last eight quarters, matched taxable gross receipts (MTGR) have averaged \$97M which is \$2.9M less than the amount reported during Q2 FY24 (\$99.9M). From Q1 FY24 to Q2 FY24, MTGR decreased by just over \$6.5M or -6.1%. As seen in Chart 2, the largest industry as a percentage of MTGR was the retail trade industry, which accounted for 33% of the total MTGR during Q2 FY24. Last quarter, the industry accounted for 31%.

**Matched Taxable Gross Receipts (MTGR)** are the best tax data available to show underlying economic activity. The data collection process matches a tax payment with reported receipts for each taxpayer by industry.

Chart 6. Establishment Year Over Year % Change

An **establishment**, as used in the QCEW and subsequently Chart 6 and Table 2, is an economic unit, such as a farm, factory, or store, which produces goods or provides services at a single physical worksite and is engaged, predominantly, in one type of economic activity.

The **Quarterly Census of Employment and Wages**, or the **QCEW**, used in Charts 5-6 and Table 2, produces comprehensive data on the number of establishments, monthly employment and quarterly wages for workers covered by state unemployment insurance (UI) laws and federal workers covered by the Unemployment Compensation for Federal Employees (UCFE) program. These data are aggregated to many different levels, starting at the 6-digit NAICS industry level, to higher industry levels (NAICS industry groups, sectors, and supersectors), and to higher geographic levels (MSA, state and national).

Data are based on information reported by New Mexico employers, covering 97% of nonfarm wage and salary workers. Data are published every quarter. Considered the gold standard for its reliability of industry data, the QCEW data are the most complete universe of monthly employment and quarterly wage information by detailed industry.
