In the third quarter of FY24, 27 out of 33 counties reported positive year-over-year (YOY) economic growth, with a statewide 8.5% increase in matched taxable gross receipts (MTGR). Statewide growth was seen across most industry sectors, with construction and professional, scientific, and technical services leading. As inflation remains stubborn, employment, wages, and the number of establishments are up YOY in New Mexico.

Bernalillo County's MTGR in Q3 FY24 totaled \$6.5B. While MTGR decreased by 1.5% (or \$97.5M) from Q2 FY24, it represents a \$541M or 9% YOY increase compared to Q3 FY23 and is also \$108M larger than the eight-quarter average, as seen in Chart 1. The largest industry by percentage of MTGR was the retail trade industry, accounting for 24% (Chart 2). Retail trade was also the largest industry in the previous quarter, comprising 25% of MTGR.

Table 1 shows that, when comparing YOY MTGR growth, the largest contribution came from the professional, scientific, and technical services industry (\$287M), which accounted for 53% of the overall growth of \$540M. The quarterly gross receipts tax (GRT) collected during Q3 FY24 (\$74.2M) was 2.8% less than the amount collected during Q2 FY24 (\$76.3M), as seen in Chart 4. Over the last eight quarters, GRT collections averaged \$74M. Chart 6 on the next page shows that the YOY change in establishments posted a 1.3% increase in Q2 FY24, with the number of establishments reaching 23K.

Chart 6. Establishment Year Over Year % Change

An **establishment**, as used in the QCEW and subsequently Chart 6 and Table 2, is an economic unit, such as a farm, factory, or store, which produces goods or provides services at a single physical worksite and is engaged, predominantly in one type of economic activity.

The **Quarterly Census of Employment and Wages**, or the **QCEW**, used in Charts 5-6 and Table 2, produces comprehensive data on the number of establishments, monthly employment, and quarterly wages for workers covered by state unemployment insurance (UI) laws and federal workers covered by the Unemployment Compensation for Federal Employees (UCFE) program. These data are aggregated to many different levels, starting at the 6-digit NAICS industry level, to higher industry levels (NAICS industry groups, sectors, and supersectors), and to higher geographic levels (MSA, state, and national).

Data are based on information reported by New Mexico employers, covering 97% of nonfarm wage and salary workers. Data are published every quarter. Considered the gold standard for its reliability of industry data, the QCEW data are the most complete universe of monthly employment and quarterly wage information by detailed industry.
