

# Quarterly Economic Summary

## San Miguel County

Released: June 2024

Prepared by: Joel Salas, Economist; Daye Kwon, Economist

Chart 1. Matched Taxable Gross Receipts Per Quarter

In the third quarter of FY24, 27 out of 33 counties reported positive year-over-year (YOY) economic growth, with a statewide 8.5% increase in matched taxable gross receipts (MTGR). Statewide growth was seen across most industry sectors, with construction and professional, scientific, and technical services leading. As inflation remains stubborn, employment, wages, and the number of establishments are up YOY in New Mexico.

Source: NM TRD - Monthly Local Government Distribution Reports (RP-500)

Over the last eight quarters, San Miguel County's MTGR has averaged \$143.8M, which is \$2.4M more than the amount reported during Q3 FY24 (\$141.4M). From Q2 FY24 to Q3 FY24, MTGR decreased by 1.4%, or just over \$2M. Despite this decline, MTGR in the county shows a relatively stable trend over the last five quarters. As seen in Chart 2, the retail trade industry accounted for 29% of total MTGR, similar to the previous quarter's 30%.

Chart 2. FY24 - Q3 Industry Size by Matched Taxable Gross Receipts

Source: NM TRD - Monthly Local Government Distribution Reports (RP-500)

**Matched Taxable Gross Receipts (MTGR)** are the best tax data available to show underlying economic activity. The data collection process matches a tax payment with reported receipts for each taxpayer by industry.

Source: NM TRD - Monthly Local Government Distribution Reports (RP-500) and EDD Calculations

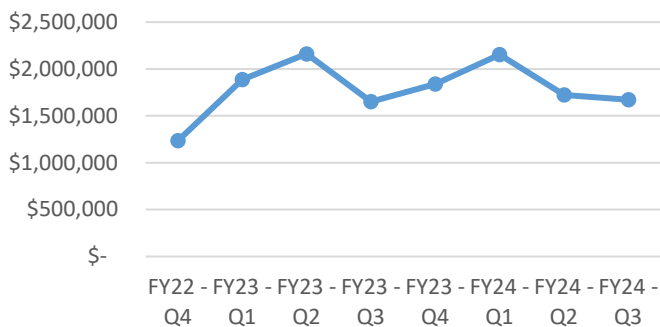

Table 1 shows that, when comparing YOY MTGR changes, San Miguel County experienced a growth of 2%, or \$3.4M. Despite the \$9.1M decline in the administrative/support and waste management/remediation industry, the health care and social assistance and retail trade industries primarily contributed to the net overall increase. The quarterly gross receipts tax (GRT) collected during Q3 FY24 (\$1.7M) was \$118K less than the eight-quarter average (\$1.8M), as seen in Chart 4. Both average employment and weekly wages increased YOY in Q2 FY 24, by 2.8% and 7.1%, respectively (Chart 5).

Chart 6. Establishment Year Over Year % Change

Source: NMDWS - Quarterly Census of Employment and Wages program and EDD Calculations

An **establishment**, as used in the QCEW and subsequently Chart 6 and Table 2, is an economic unit, such as a farm, factory, or store, which produces goods or provides services at a single physical worksite and is engaged, predominantly, in one type of economic activity.

The **Quarterly Census of Employment and Wages**, or the **QCEW**, used in Charts 5-6 and Table 2, produces comprehensive data on the number of establishments, monthly employment, and quarterly wages for workers covered by state unemployment insurance (UI) laws and federal workers covered by the Unemployment Compensation for Federal Employees (UCFE) program. These data are aggregated to many different levels, starting at the 6-digit NAICS industry level, to higher industry levels (NAICS industry groups, sectors, and supersectors), and to higher geographic levels (MSA, state, and national).

Data are based on information reported by New Mexico employers, covering 97% of nonfarm wage and salary workers. Data are published every quarter. Considered the gold standard for its reliability of industry data, the QCEW data are the most complete universe of monthly employment and quarterly wage information by detailed industry.

Table 2. FY24 - Q2 Employment Data and Establishments by Industry

Industry	Average Employment	YOY Change in Average Employment	Average Weekly Wage	YOY change in Average Weekly Wage	Number of Establishments	YOY Change in Establishments
