

Quarterly Economic Summary

Catron County

Released: September 2024

Prepared by: Joel Salas, Economist; Daye Kwon, Economist

Chart 1. Matched Taxable Gross Receipts Per Quarter

Source: NM TRD - Monthly Local Government Distribution Reports (RP-500)

In the fourth quarter of FY24, 23 out of 33 counties reported positive year-over-year (YOY) economic growth, with a statewide 3.2% increase in matched taxable gross receipts (MTGR). Statewide growth was seen across most industry sectors, with professional, scientific, and technical services and other services leading. Employment, wages, and the number of establishments are up YOY in New Mexico.

Over the last eight quarters, Catron County's MTGR has averaged \$21.3M, which is \$3.5M more than the amount reported during Q4 FY24 (\$17.8M). From Q3 FY24 to Q4 FY24, MTGR decreased by 16.6%, or just over \$3.5M. Despite this decline, MTGR in the county shows a stable trend. As seen in Chart 2, the construction and retail trade industries accounted for 52% of total MTGR. In Q3 FY24, the construction industry alone made up 48% of total MTGR.

Chart 2. FY24 - Q4 Industry Size by Matched Taxable Gross Receipts

Source: NM TRD - Monthly Local Government Distribution Reports (RP-500)

Matched Taxable Gross Receipts (MTGR) are the best tax data available to show underlying economic activity. The data collection process matches a tax payment with reported receipts for each taxpayer by industry.

Table 1 shows that, when comparing YOY MTGR growth, the largest contribution came from the construction industry, which posted a YOY increase of \$3M. The largest decline came from the wholesale trade industry, which posted a YOY decrease of \$242K. The quarterly gross receipts tax (GRT) collected during Q4 FY24 (\$203K) was 15.5% less than the amount collected during Q3 FY24 (\$240K), as seen in Chart 4. Over the last eight quarters, GRT collections have averaged \$250K. Chart 5 shows that average total employment and weekly wages in Q3 FY24 grew by 4.6% and 7.1% YOY, respectively.

Catron County

Chart 6. Establishment Year Over Year % Change

An **establishment**, as used in the QCEW and subsequently Chart 6 and Table 2, is an economic unit, such as a farm, factory, or store, which produces goods or provides services at a single physical worksite and is engaged, predominantly, in one type of economic activity.

The **Quarterly Census of Employment and Wages**, or the **QCEW**, used in Charts 5-6 and Table 2, produces comprehensive data on the number of establishments, monthly employment, and quarterly wages for workers covered by state unemployment insurance (UI) laws and federal workers covered by the Unemployment Compensation for Federal Employees (UCFE) program. These data are aggregated to many different levels, starting at the 6-digit NAICS industry level, to higher industry levels (NAICS industry groups, sectors, and supersectors), and to higher geographic levels (MSA, state, and national).

Data are based on information reported by New Mexico employers, covering 97% of nonfarm wage and salary workers. Data are published every quarter. Considered the gold standard for its reliability of industry data, the QCEW data are the most complete universe of monthly employment and quarterly wage information by detailed industry.

Table 2. FY24 - Q3 Employment Data and Establishments by Industry

Industry	Average Employment	YOY Change in Average Employment	Average Weekly Wage	YOY change in Average Weekly Wage	Number of Establishments	YOY Change in Establishments
