In the first quarter of FY25, 20 out of 33 counties reported positive year-over-year (YOY) economic growth compared to Q1 FY24, with a statewide 1.8% increase in matched taxable gross receipts (MTGR). Statewide growth was observed across most industry sectors, with the construction industry leading the way. Employment, wages, and the number of establishments have also increased YOY at the state level.

Doña Ana County's MTGR slightly declined by 0.3%, or \$5.3M, from Q4 FY24 to Q1 of FY25, but it remains \$68M above the eight-quarter average of \$1.44B (Chart 1). Retail trade, construction, and health care and social assistance were the top three industries by MTGR in Q1 FY25, as seen in Chart 2. Table 1 on the following page shows a 2% YOY MTGR increase in Q1 FY25, equivalent to \$29.1M, compared to Q1 FY24.

Matched Taxable Gross Receipts (MTGR) provide the most accurate tax data for assessing underlying economic activity. The data collection process involves matching tax payments with reported receipts for each taxpayer by industry.

An **establishment**, as defined by the Quarterly Census of Employment and Wages (QCEW) and referenced in Chart 6, is an economic unit, such as a farm, factory, or store, located at a single physical address and engaged in one type of economic activity.

Gross Domestic Product (GDP) measures the value of all goods and services produced within a specific area. Changes in GDP from one period to another are important indicators of how the economy is performing. Chart 7 illustrates the YOY percentage change in real GDP for calendar years. Table 2 below details the percentage contribution of each industry to the total GDP for a specific county and how each industry's GDP changed compared to the previous calendar year.
