In the first quarter of FY25, 20 out of 33 counties reported positive year-over-year (YOY) economic growth compared to Q1 FY24, with a statewide 1.8% increase in matched taxable gross receipts (MTGR). Statewide growth was observed across most industry sectors, with the construction industry leading the way. Employment, wages, and the number of establishments have also increased YOY at the state level.

Over the last eight quarters, Valencia County's MTGR has averaged \$478.4M, which is \$88K more than the amount reported during Q1 FY25 (\$478.3M). From Q4 FY24 to Q1 FY25, MTGR decreased by 2.9%, or just over \$14.1M. Despite this decline, MTGR in the county shows a stable trend. As seen in Chart 2, the construction and retail trade industries accounted for 55% of total MTGR. They were also the top two industries in Q4 FY24, comprising 57%.

Changes in GDP from one period to another are important indicators of how the economy is performing. Chart 7 illustrates the YOY percentage change in real GDP for calendar years. Table 2 below details the percentage contribution of each industry to the total GDP for a specific county and how each industry's GDP changed compared to the previous calendar year.
