In the first quarter of FY24, 28 of 33 counties saw year-over-year economic growth, with 9.1% growth statewide in matched taxable gross receipts (MTGR). State gross receipts increased from the fourth quarter of FY23, bringing it to the highest ever quarterly total in MTGR for the state.

Rio Arriba County's matched taxable gross receipts (MTGR) increased by \$47.3M from Q4 FY23 to Q1 of FY24. Retail trade. construction. and accommodation food services were the top three industries bv MTGR in Q1 FY24, as seen in Chart 2. Table 1, on the next page, shows a year-overyear (YOY) increase in Q1 FY24 of 15%, or \$28.4M, compared Q1 FY23. The largest contributor to this increase unclassified was establishments sector.

Matched Taxable Gross
Receipts (MTGR) are the
best tax data available to
show underlying economic
activity. The data
collection process matches
a tax payment with
reported receipts for each
taxpayer by industry.

The agriculture, forestry, fishing, and hunting industry, in Table 1, shows negative MTGR in Q1 FY23. This could be due to amended tax filings with TRD. Gross receipts tax (GRT) revenue collections increased by \$2M, or 83.2%, from Q4 FY23 to Q1 of FY24, as seen in Chart 4. Over the last eight quarters GRT collections have averaged \$2.6M.

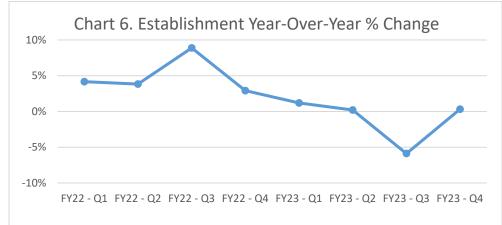

Shown in Chart 5, Q4 FY23 total average employment in the county grew by 211, YOY, which equates to a percentage increase of 2.2%. Average weekly wages in Q4 FY23 experienced a YOY increase of \$74 or 8.6%.

An establishment, as used in the QCEW and subsequently Chart 6 and Table 2, is an economic unit, such as a farm, factory, or store, which produces goods or provides services at a single physical worksite and engaged, predominantly, in one type of economic activity.

Gross Domestic Product (GDP) is the value of all goods and services produced in an area. The percentage that GDP grew (or shrank) from one period to another is an important indicator as to how the economy is performing. Table 2, below, shows the percentage of GDP each industry accounts for in the total GDP, in a specific county and the state. The chart also compares the county to the entire state of New Mexico, by showing the impact of specific industry sectors on the county's GDP compared to that of the whole state.
