## **Greetings from the New Mexico Economic Development Department,**

The 10th International Conference on Concentrator Photovoltaic Systems (CPV-10) will be held in Albuquerque from April 7-9, 2014. The host committee from CFV Solar Test Laboratory, Fraunhofer USA and Sandia National Laboratories is proud to bring this world-class conference to New Mexico.

The New Mexico Economic Development department would like to encourage you to become a sponsor and present your company and New Mexico in the best possible way at CPV-10, where cutting edge science meets solar power plant deployment!

This sponsorship opportunity provides an outstanding way for suppliers of components and services to the PV and CPV industry, such as trackers, optics, cells, controls, and financial services, to connect with experts and potential customers from all over the world. Some 400 participants from more than 25 countries including many corporate executives from a number of global companies are expected to participate in this event.

There are a variety of sponsorship packages that allow a fit for all budgets and target groups. You may also arrange your own customized sponsorship package according to your preferences.

As a sponsor, you will...

- be publicly recognized before, during and after the conference
- increase your brand recognition through your online and on-site presence
- make direct personal contact with important players of your target groups
- introduce your innovative ideas and latest products to CPV experts/customers
- have prime exhibition space, which will provide visibility and excellent opportunities to network

Sincerely,

The New Mexico Economic Development Department
