Quarterly Economic Summary Curry County

ECONOMIC DEVELOPMENT DEPARTMENT

Released: August 2020

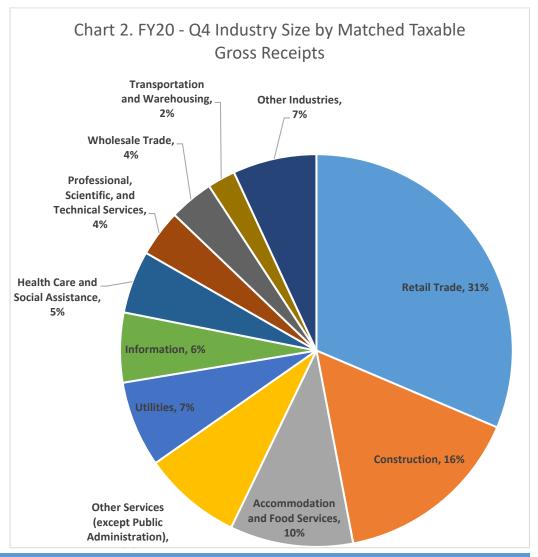

Prepared by: Joel Salas, Economist, and Ryan Eustice, Economist

The fourth quarter of FY20 is the first full quarter of economic impacts from the COVID-19 pandemic. Business closures and reduced consumer spending locally began to take effect at the end of March. Since then, the state instituted reopening phases designed to slow the spread of the virus while providing a systematic approach to reopening the economy. However, the continuation of the COVID-19 health crisis and the subsequent closures of many businesses statewide caused downward trends in matched taxable gross receipts across the state.

Curry County's matched taxable gross receipts (MTGR) increased from Q3 FY20 to Q4 FY20, increasing from \$213.7M to \$237.7M respectively, as seen in Chart 1. Curry County's MTGR tends to hit a seasonal peak in the fourth quarter of the fiscal year. Table 1, on page 2, shows a year over year (YOY) decline in Q4 FY20 of 8% compared FY19. The to 04 Construction industry saw the largest YOY decline, decreasing by nearly \$20M.

Matched Taxable Gross Receipts (MTGR) is the best tax data available to show underlying economic activity. It matches a tax payment with reported receipts for each taxpayer, by industry.

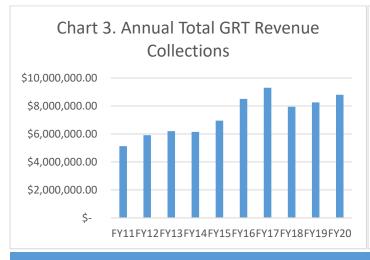

Quarterly Economic Summary Curry County

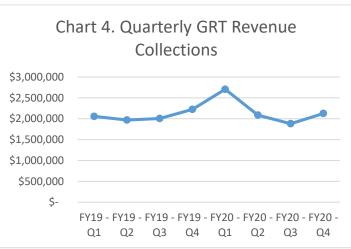

Table 1. Matched Taxable Gross Receipts by Industry									
Industries		FY19 - Q4		FY20 - Q4		Growth	Year over	year Cl	nange
Accommodation and Food Services	\$	27,922,983	\$	24,125,683	\$	(3,797,300)			-14%
Administrative/Support & Waste Management/Remediation	\$	7,491,609	\$	3,146,083	\$	(4,345,526)			-58%
Agriculture, Forestry, Fishing, and Hunting	\$	656,730	\$	790,427	\$	133,697			20%
Arts, Entertainment, and Recreation	\$	874,093	\$	294,503	\$	(579,591)			-66%
Construction	\$	56,948,926	\$	37,079,850	\$	(19,869,076)			-35%

All Industries	\$	259,683,108	\$	237,714,753	\$	(21,968,355)			-8%

Annual Gross receipts tax (GRT) revenue collections saw a 7% increase from FY19 to FY20, an increase of \$543K as seen in Chart 3. Despite the negative impacts COVID-19 has had on the county's economy, the early quarters of FY20 have helped annual GRT revenue collections in FY20 surpass those of FY19. Quarterly GRT revenue collections increased in Q4 FY20 after a low point in Q3 FY20. Q4 FY20 increased by \$245K, 13%, from Q3 FY20 but experienced a YOY decrease of 4% compared to Q4 FY20.

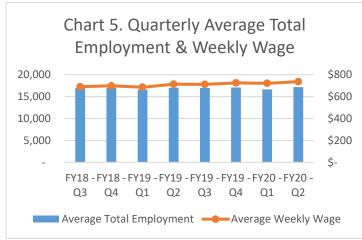

HB6, passed in 2019, made widespread tax changes within New Mexico. One notable change is the conversion to destination-based sourcing that will begin after a two-year delay. During the 2020 Special Session, that legislation was amended, increasing a temporary distribution to municipalities and counties. Now municipalities will receive a distribution that is a portion of \$2.5 million while counties will receive a distribution that is a portion of \$1.5 million. The amounts distributed will be proportional to the size of the community's population versus that of the entire group. These amounts are subject to change if the federal government provides municipalities and counties future grants to offset revenue declines attributable to COVID-19.

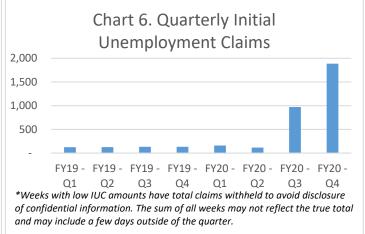

Quarterly Economic Summary Curry County

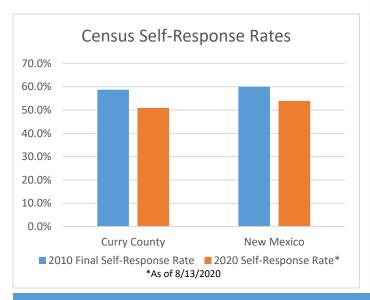

New Mexico receives over \$6 billion each year through federal programs which benefit the entire community: health care, nutrition, highways, education, housing, jobs and more that allocate funds on a per capita basis. Each New Mexican not counted equates to a loss of approximately \$3,745 in funding per year. If New Mexico undercounts residents by only 1%, the state would lose \$780 million in revenue over the next 10 years.

Cost of 1% Census Undercount Over 10 Years in Curry County

\$14,804,126

A significant unexplained increase in initial unemployment claims can be an early indicator of an economic downturn. Explained increases commonly include seasonal job fluctuations, federal government shutdowns resulting in employee furloughs, or the closing of a major regional facility. This unprecedented uptick in initial unemployment claims is obviously tied directly to the COVID-19 pandemic and subsequent furloughs and layoffs by affected businesses. As the phased reopening continues, it is likely the number of initial unemployment claims will flatten out and then decrease, but it is impossible to predict how quickly the employment numbers will return to pre-COVID levels.
