Q4

Q1

The three months making up FY21 Q1 were the worst three months of the state's economic impact from COVID-19, comparing gross receipts data with the same period a year ago, despite 14 counties experiencing a year-over-year increase. The impacts were significantly worse due to lapsing federal support and no new federal aid package. Importantly, the federal bonus for unemployment benefits of an additional \$600/week expired, reducing consumer spending power.

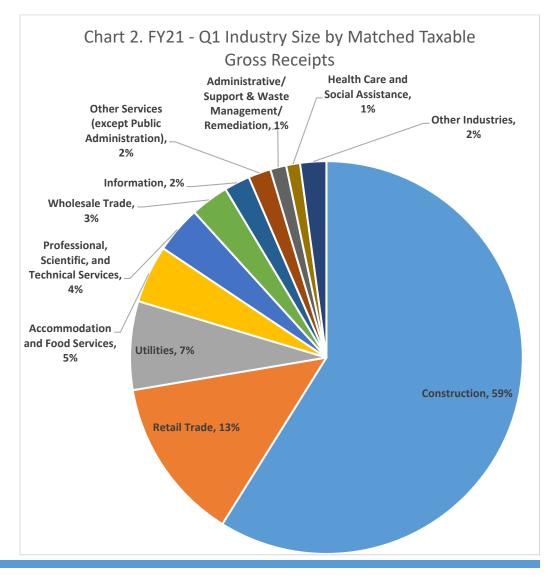

Hidalgo County has seen substantial growth in its matched taxable gross receipts (MTGR), shown in Chart 1. From Q4 FY20 to Q1 Hidalgo County's MTGR increased by \$15.4M or just shy of 74%. The last time that quarterly MTGR was this high was in Q3 FY18, when Hidalgo had County \$42M in quarterly MTGR. Chart 2 shows construction that the industry made up 59% of the quarterly MTGR, this is an increase of 166% when

All Industries	\$	16,024,564	\$	36,385,584	\$	20,361,021		127%

comparing Q1 FY21 to Q4 FY20. Table 1 shows that Hidalgo County saw a year over year increase of \$20M, or 127%, when comparing Q1 FY20 to the same time period in FY21. The increase is almost exclusively due to the increase in the construction industry, which experienced year over year growth just shy of \$20M, or 1,363%.

Gross receipts tax (GRT) revenue collections rose significantly in Q1 FY21, as seen in Chart 4. From Q4 FY20 to Q1 FY21, quarterly collections increased by \$168K, or 87%.

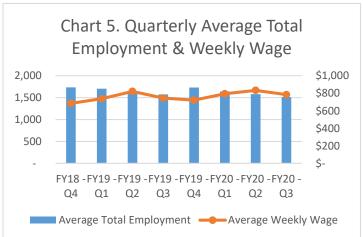

HB6, passed in 2019, made widespread tax changes within New Mexico. One notable change is the conversion to destination-based sourcing that will begin after a two-year delay. During the 2020 Special Session, that legislation was amended, increasing a temporary distribution to municipalities and counties. Now municipalities will receive a distribution that is a portion of \$2.5 million while counties will receive a distribution that is a portion of \$1.5 million. The amounts distributed will be proportional to the size of that community's population versus that of the entire group. These amounts are subject to change if the federal government provides municipalities and counties future grants to offset revenue declines attributable to COVID-19.

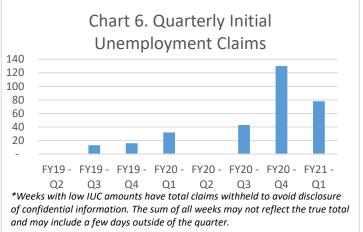

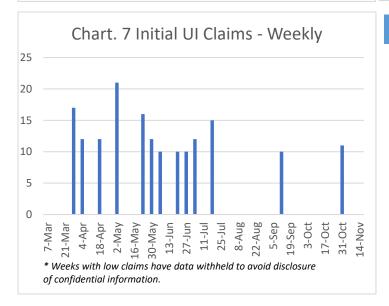

Quarterly Economic Summary Hidalgo County

significant unexplained increase unemployment claims can be an early indicator of an economic downturn. Explained increases commonly include seasonal job fluctuations, federal government shutdowns resulting in employee furloughs, or the closing of a major regional facility. This unprecedented uptick in initial unemployment claims is tied directly to the COVID-19 pandemic and subsequent furloughs and layoffs by affected businesses. As we continue into early and mid-2021, it is likely the number of initial unemployment claims will vary based on the effects of the pandemic but gradually wane; however, it is impossible to predict how quickly the employment numbers will return to pre-COVID-19 levels.

<u>Chart 7</u> – Includes weekly initial claims for regular unemployment insurance (UI) but excludes pandemic unemployment assistance (PUA) and pandemic emergency unemployment assistance (PEUA) claims. Weeks shown as zero were redacted for confidentiality.

<u>Chart 8</u> – Includes claimants receiving payment and pending certifications for standard UI, PUA, PEUA, extended benefits, and trade readjustment allowances. As of 11/2/2020, claimants who were initially considered eligible but have either never filed a certification or have not certified within 14 days have been removed from data, resulting in lower numbers.
