

Quarterly Economic Summary

Mora County

Released: March 2022

Prepared by: Joel Salas, Economist; Ryan Eustice, Economist

Chart 1. Matched Taxable Gross Receipts Per Quarter

Thirty of 33 counties saw significant year-over-year economic growth in the second quarter of FY22. Growth was also broad across industry sectors, with arts, entertainment and recreation leading the growth in gross receipts, up 143% over the year. COVID-19 continues to disrupt some supply chains, and rising inflation poses a risk of slower national economic growth; however, the immediate outlook is for continued strong growth in New Mexico. Additionally, any inflationary impacts will serve to boost gross receipts and related revenues.

Over the last eight quarters, matched taxable gross receipts (MTGR) have reported a quarterly average of \$11.7M, this is \$7M lower than the amount reported for Q2 FY22 (\$18.7M). This is the largest amount reported in Mora County's history. From Q1 FY22 to Q2 FY22, MTGR increased by \$115K or 1%. During Q2, the month of December reported the largest amount of MTGR for the quarter, representing 50% of the total quarterly MTGR.

Chart 2. FY21 - Q2 Industry Size by Matched Taxable Gross Receipts

Matched Taxable Gross Receipts (MTGR) are the best tax data available to show underlying economic activity. The data collection process matches a tax payment with reported receipts for each taxpayer by industry.

Chart 6. Claimants Receiving Unemployment Benefits Per Week

* Data in weeks with low claimant amounts may be withheld to avoid disclosure of confidential information

Data in Chart 6 includes claimants receiving payment for standard unemployment insurance, pandemic unemployment assistance, pandemic emergency unemployment assistance, extended benefits, and trade readjustment allowances. Data are unofficial and subject to change. Extended Federal Unemployment Insurance benefits ended September 4th, 2021. This explains the decrease in the number of claimants shortly after this date. Data can be considered a three-week average.

Gross Domestic Product (GDP) is the value of all goods and services produced in an area. The percentage that GDP grew (or shrank) from one period to another is an important indicator as to how the economy is performing. Table 2, below, shows the percentage of GDP each industry accounts for in the total GDP, in a specific county and the state. The chart also compares the county to the entire state of New Mexico, by showing the impact of specific industry sectors on the county's GDP compared to that of the whole state.
