

# Quarterly Economic Summary

## Roosevelt County

Released: September 2022

Prepared by: Joel Salas, Economist; Ryan Eustice, Economist

Chart 1. Matched Taxable Gross Receipts Per Quarter

Gross receipts growth across the state significantly outpaced inflation over the last year, and 31 of 33 counties saw growth during that time. The state improved from an already strong third quarter for economic growth in the fourth quarter of FY22 of 20% for all industries compared with the same quarter a year ago and an increase of 29% compared with the same quarter before the COVID-19 pandemic hit. Rising inflation and interest rates pose risks, but the outlook is for continued strong growth in New Mexico.

Since Q1 FY19 Roosevelt County's matched taxable gross receipts (MTGR) have experienced a flat trend. During the time span the average amount of reported MTGR has been \$112M or \$20.6M more than the amount reported during Q4 FY22 (\$91M). From Q3 FY22 to Q4 FY22 MTGR decreased by \$2M, or 2%, shown in Chart 1. The retail trade industry was the largest contributor to the county's MTGR, as seen in Chart 2. Table 1, on the next page, shows an increase of

Chart 2. FY22 - Q4 Industry Size by Matched Taxable Gross Receipts

**Matched Taxable Gross Receipts (MTGR)** are the best tax data available to show underlying economic activity. The data collection process matches a tax payment with reported receipts for each taxpayer by industry.

## Roosevelt County

Chart 6. Establishment Year-Over-Year % Change

An **establishment**, as used in the QCEW and subsequently Chart 6 and Table 2, is an economic unit, such as a farm, factory, or store, which produces goods or provides services at a single physical worksite and engaged, predominantly, in one type of economic activity.

The **Quarterly Census of Employment and Wages**, or the **QCEW**, used in Charts 5-6 and Table 2, produces comprehensive data on the number of establishments, monthly employment and quarterly wages for workers covered by state unemployment insurance (UI) laws and federal workers covered by the Unemployment Compensation for Federal Employees (UCFE) program. These data are aggregated to many different levels, starting at the 6-digit NAICS industry level, to higher industry levels (NAICS industry groups, sectors, and supersectors), and to higher geographic levels (MSA, state and national).

Data are based on information reported by New Mexico employers, covering 97% of nonfarm wage and salary workers. Data are published every quarter. Considered the gold standard for its reliability of industry data, the QCEW data are the most complete universe of monthly employment and quarterly wage information by detailed industry.

Table 2. FY22 - Q3 Employment Data and Establishments by Industry

Industry	Average Employment	YOY Change in Average Employment	Average Weekly Wage	YOY change in Average Weekly Wage	Number of Establishments	YOY Change in Establishments
Accommodation and Food Services	589	16.2%	\$ 315	7.1%	34	9.7%
