

Quarterly Economic Summary

Rio Arriba County

Released: March 2023

Prepared by: Joel Salas, Economist; Ryan Eustice, Economist

Chart 1. Matched Taxable Gross Receipts Per Quarter

In the second quarter of FY23, 26 of 33 counties saw year-over-year economic growth, averaging 16% growth statewide. State gross receipts dropped slightly in October and November from the prior few months but rose significantly in December to a new record high. First quarter growth in FY23 was abnormally high, and the second quarter appears to have normalized with seasonal trends while still rising at a steady pace. However, national concerns remain regarding inflation and rising interest rates.

Rio Arriba County's matched taxable gross receipts (MTGR) remained relatively flat in Q2 FY23 as compared to Q1 FY23, seen in Chart 1. From Q1 FY23 to Q2 FY23 MTGR declined by \$2.4M or nearly 1%. Despite this decline, MTGR reported for Rio Arriba County during Q2 FY23 is the second largest amount ever reported for the county (\$185M). Table 1, on the next page, shows an increase of \$50M from Q2 in FY22 to FY23 of the same period. Table 1 also

Chart 2. FY23 - Q2 Industry Size by Matched Taxable Gross Receipts

Matched Taxable Gross Receipts (MTGR) are the best tax data available to show underlying economic activity. The data collection process matches a tax payment with reported receipts for each taxpayer by industry.

shows that all but three industries reported a year-over-year (YOY) increase. The three industries that reported a combined YOY decrease totaled less than \$500K. The largest increase came from the oil and gas industry, which posted a YOY increase of \$23M or 830%.

Gross receipts tax (GRT) revenue collections decreased by \$673K, or 20%, from Q1 FY23 to Q2 FY23, seen in Chart 4.

Chart 3 shows that annual GRT collections in FY23 are outpacing FY22 during the first two quarters by \$500K.

Chart 6. Establishment Year-Over-Year % Change

An **establishment**, as used in the QCEW and subsequently Chart 6 and Table 2, is an economic unit such as a farm, factory, or store, which produces goods or provides services at a single physical worksite and is engaged, predominantly, in one type of economic activity.

The **Quarterly Census of Employment and Wages**, or the **QCEW**, used in Charts 5-6 and Table 2, produces comprehensive data on the number of establishments, monthly employment and quarterly wages for workers covered by state unemployment insurance (UI) laws and federal workers covered by the Unemployment Compensation for Federal Employees (UCFE) program. These data are aggregated to many different levels, starting at the 6-digit NAICS industry level, to higher industry levels (NAICS industry groups, sectors, and supersectors), and to higher geographic levels (MSA, state and national).

Data are based on information reported by New Mexico employers, covering 97% of nonfarm wage and salary workers. Data are published every quarter. Considered the gold standard for its reliability of industry data, the QCEW data are the most complete universe of monthly employment and quarterly wage information by detailed industry.
